SUMMARY

Data Science undergraduate with hands-on experience in Python and SQL for data cleaning, exploratory data analysis, and visualization. Strong analytical mindset with experience working on real-world datasets and delivering actionable insights.

EDUCATION

Usha Mittal Institute of Technology, Mumbai **Present**

- 3rd Year Average CGPA: 7.00
- 2nd Year Average CGPA: 6.50
- 1st Year Average CGPA: 6.05

Mahatma Jyotirao Phule Junior College, Kinwat **Feb 2021**

- Higher Secondary Certificate Examination: 91.83%

Bhaskaracharya Vidyaniketan, Aurangabad **March 2019**

- Secondary School Certificate Examination: 86.20%

SKILLS

- Programming: Python, SQL
- Libraries & Frameworks: Pandas, NumPy, Matplotlib
- Data Analytics: Data cleaning, data visualization, exploratory data analysis (EDA)
- Data Visualization: Power BI, Tableau
- ETL & Data Processing: Data extraction, cleaning, and transformation using Python (Pandas) Databases: SQL (queries,
- joins)

WORK EXPERIENCE

Data Science Intern, Imarticus Learning

- Worked on real-world datasets, performing cleaning, visualization, and preliminary model building. Gained exposure to Python, machine learning basics, and business analytics tools.
-

PROJECTS

AI-Driven Customer Delinquency Risk Analysis

- Performed exploratory data analysis to assess data quality and identify customer delinquency risk indicators. Designed a no-code, GenAI-assisted predictive framework for delinquency risk assessment.
- Proposed an AI-driven collections strategy incorporating ethical AI, regulatory compliance, and scalability.
-
- **Cultural Authenticity of Food**

  Tools & Technologies: Python, SQL, NLP, TF-IDF, Cosine Similarity, Data Cleaning, Feature Engineering
- Built an NLP-based food authenticity scoring system using TF-IDF and similarity algorithms to compare restaurant and traditional recipes.
- Processed recipe data using Python and SQL to compute recipe similarity and authenticity scores

EXTRA–CURRICULAR ACTIVITIES

1. Secretary of Women in Engineering Council
